WIS 110

(Algoma Boulevard)

Public information meeting

Description

The construction of this project begins at Murdock Avenue and extends north approximately 1.4 miles to the US 41 interchange.

Existing conditions

Existing WIS 110 has deteriorating pavement and does not have the needed capacity to accommodate predicted increases in traffic due to area development. The existing storm sewer system also needs to be upgraded.

Proposed roadway

We are proposing to expand the existing two-lane roadway to a four-lane undivided, urban roadway in order to accommodate predicted increases in traffic due to area development. Improvements to the storm sewer system are also needed to improve roadway drainage. The existing sidewalk along WIS 110 will be replaced and new sidewalk from Winchester Avenue to Packer Avenue will be constructed.

Detour route/local access

WIS 110 will be closed to traffic during construction and detoured via US 45 and WIS 21. Local access for residents, business, and emergency vehicles will be maintained at all times during construction.

Right of way

Right-of-way acquisition on the east side of the road between Murdock St. and Columbia Ave. is needed to accommodate the proposed left turn lane from southbound WIS 110 to eastbound Murdock St. Temporary Limited Easements along WIS 110 are also needed for grading and driveway reconstruction.

Project cost

The estimated cost of construction is \$3.1 million.
